SARWAR HOSSAIN

Full Stack Software Engineer

Dhaka, Bangladesh - +8801932893580 - sarwarhossainhridoy98@gmail.com

https://github.com/Sarwarhridoy4 - https://sarwar.himulingua.com/ - https://www.linkedin.com/in/sarwar-hossain-hridoy/

PROFESSIONAL SUMMARY

Full Stack Software Engineer with professional development experience since 2023, building business-facing web applications and a learning management system across the full stack. Practical experience with React, Next.js, TypeScript, Node.js, Express, MongoDB, and PostgreSQL, plus Go-based developer tools and automation. Skilled in deploying and troubleshooting applications on Linux VPS environments using Docker, reverse proxies, and SSL/TLS. Currently developing and maintaining the Himu Lingua LMS on a Hostinger VPS.

TECHNICAL SKILLS

Frontend - JavaScript, TypeScript, React.js, Next.js, HTML, CSS, Tailwind CSS, Redux Toolkit, responsive UI, reusable component architecture
Backend - Node.js, Express.js, Go, REST API development, authentication & authorization, JWT, bcrypt, MVC architecture, error handling, validation
Databases - MongoDB, PostgreSQL, Prisma ORM, Mongoose, database modeling, Zod schema validation, aggregation pipelines
DevOps & Infrastructure - Linux/Ubuntu, Docker, Hostinger VPS administration, Coolify, Traefik/Caddy, DNS, SSL/TLS, reverse proxies, application deployment, backup automation, GitHub Actions CI/CD
Developer Tools - Git, GitHub, shell scripting, API testing & debugging (Postman, Swagger), technical documentation, build & deployment troubleshooting

PROFESSIONAL EXPERIENCE

Himu Lingua (formerly German Ostad) - Full Stack Developer

Remote, Project-Based - August 2024 - Present - Remote

- **Designed and developed a Learning Management System (LMS) from scratch** using the MERN stack with TypeScript, including course-viewing interfaces, administrative dashboards, and custom authentication workflows.
- **Built REST APIs and backend services** with Node.js and Express, integrating MongoDB data models, protected routes, session management, and video-based learning capabilities.
- **Deployed and maintained the application on a Hostinger VPS** using Docker, Linux server administration, reverse proxy configuration, and SSL/TLS certificates; contributed to performance monitoring, reliability, and scalability.
- **Collaborated across frontend and backend development,** application integration, server deployment, and ongoing technical improvements under a project-based engagement.

3W Private Limited - Full Stack Developer

Full-time - August 2023 - August 2024 - India

- **Delivered business-facing web applications** using React.js and Express.js, spanning frontend UI development and backend API implementation.
- **Built backend API endpoints and MongoDB data models** to support application functionality, including database-driven features and end-to-end web application development.
- **Developed dynamic, responsive user interfaces** based on client requirements, emphasizing integration between frontend components and backend services.

Scanskill Edtech India Pvt. Ltd. - Full Stack Web Developer Intern

Internship - April 2023 - June 2023 - India

- **Fixed frontend and backend bugs** and contributed to feature development on an existing web application.
- **Improved UI consistency and maintainability** through reusable React components.
- **Contributed to API integrations and real-time application updates,** helping improve application functionality and user experience.

SELECTED PROJECTS

Digital Wallet Management System

Express.js, TypeScript, MongoDB, Mongoose, JWT, Cloudinary

Secure, role-based backend API modeled on digital wallet platforms. Implemented User, Agent, and Admin roles with isolated dashboards; wallet top-up, send money, withdraw, and cash-in/out flows with commission handling; JWT access/refresh tokens, email password reset, KYC verification, and account blocking.

Live: https://digital-wallet-management-system-kappa.vercel.app Source: https://github.com/Sarwarhridoy4/Digital_Wallet_Management_System

Mongo Drive Backup

Go, MongoDB, Google Drive API, Docker, Coolify

Production-ready Go service that periodically backs up MongoDB databases and uploads them to Google Drive. Scheduled backups with cron, compression, retention cleanup, and upload verification; built-in web dashboard with real-time WebSocket updates for status, logs, and backup history; OAuth 2.0 and service-account support; Docker-ready with healthchecks and Coolify deployment.

Image Optimiser - Upload & Compression API

Node.js, Express, TypeScript, MongoDB, Cloudinary, Sharp, Swagger, Nodemailer

Secure image upload API with JWT authentication and access/refresh tokens. Compresses images to WebP using Sharp; Cloudinary integration with Multer upload and Zod validation; Swagger API documentation; welcome emails via Nodemailer with EJS templates.

Live: https://image-compress-upload.vercel.app

Express + Prisma MVC Boilerplate

Express.js, TypeScript, Prisma, PostgreSQL, JWT, bcrypt

Clean modular MVC boilerplate for scalable Express servers. Prisma ORM with PostgreSQL, JWT authentication, bcrypt password hashing, centralized error handling, and environment-based configuration; supports npm, yarn, pnpm, and bun.

MongoDB Exporter GUI

Python, PySide6, MongoDB, Cryptography, Google Drive API

Desktop application that exports MongoDB collections to JSON with a neumorphic UI and theme switcher. Optional Zip compression, AES-GCM encryption with in-app decryption, Google Drive upload, backup scripts, real-time progress tracking, and built-in updater; cross-platform packaging (.deb and AppImage).

EDUCATION

Diploma in Engineering - SM Tofazzal Hossain Polytechnic Institute, 2021 (CGPA 3.67/4.0)

CERTIFICATIONS

Generative AI Mastermind - Outskill / GrowthSchool

Certificate of Completion - Sarwar Hossain (issuer: Vaibhav Sisinity, Founder, GrowthSchool)

Complete Web Development - Programming Hero

Certificate of Completion - Sarwar Hossain
